

framework agreement for getmysense institutions

1. Definition of getmysense

- getmysense is a coalition of companies, that brings together people with similar preferences and interests worldwide in over 2,500 languages. Which words you are using, shows how you think and what you wish. Meet like-minded people on getmysense.
- getmysense combines the best special interest networks. In about 1,000 categories the best online service portals and shops are coupled by getmysense over special interest blogs. getmysense is linked depending on the category, with hundreds of social media platforms and search engines. Then these networks are adapted to other countries and by the finder technology are combined into an overall system without losing their independence.

2. Institutions of getmysense

(1) The getmysense network consists of the global technology provider and creator of the overall concept getTIME.net GmbH.

(2) Furthermore, the network consists of from getTIME.net certified agencies with exclusivity for getmysense to a region for user support, content creation and content translation for B2B and B2C clients, as well as marketing and public relations.

(3) Furthermore, the getmysense network consists of a panel of judges, whose number is as following regulated:

Included is not more than one judge per country or language area, in larger countries, a judge for every 10 million inhabitants with a GDP per capita over \$ 10,000 and a judge for every 100 million inhabitants with a GDP per capita below \$ 10,000.

The panel of judges decides on all B2B getmysense projects within the getmysense maximes.

3. Maximes of getmysense

- Situation: The world is more global and more complex and less controllable. There is the need for global regulatory systems, which make this complexity manageable.
(1) Maxim: getmysense will be such a regulatory system. People with similar interests around the world connect together and make the individual segments manageable.
- (2) Maxim: The individual is important as a counterbalance to the globalized world. getmysense protects moral rights such as privacy and freedom of expression.
- Situation: In a global world endless information is available. So it is easy to falsify information.
(3) Maxim: getmysense is synonymous with the Trusted Internet and the WhoValueTrue principle.
- Situation: In a one click more Internet business relationships are volatile and non-binding.
(4) Maxim: getmysense stands for sustainable relationships, especially for sustainable business relationships.

- Situation: The globalization promotes mass products.
(5) Maxim: getmysense advocates the preservation of the diversity of languages, information and products.

4 . Application process for B2B projects

All getmysense B2B collaborations such as partnerships with Primus special interest networks are decided by an independent panel of judges.

Applications can e.g. awarded for a single getmysense category or also be initiated by applicants.

Either a member of the panel of judges is determined responsible for a award or the applicant will select a single member of panel of judges, which represents the candidate as a mentor to the panel of judges. The mentor is in the decision on the project, supervised by him excluded from voting.
